

## REMARKS

Upon entry of the amendments, claims 1, 5-13, 17-33 will be pending in the application. The Examiner has indicated that claims 21-26 are allowed. The Examiner has also indicated that claims 5, 7, 8, 17, 19, and 20 would be allowable if rewritten into independent format. Due to this indication, Applicants have added claims 27-33 to the application.

Applicants provide the following comments to the rejections detailed in the Office Action.

### *Claim Rejections – 35 U.S.C. § 102*

Claims 1, 6, 9-12, and 18/1 are rejected as being anticipated by Knecht, Hatanaka, or JP '741.

The Examiner noted in the final rejection that the claims did not restrict the electrode structure as completely conductive. Applicants have amended independent claim 1 to clarify that the projecting electrodes consist of solder. None of the cited prior art inherently or explicitly discloses an electrode made of solder.

Applicants respectfully submit that independent claim 1 and dependant claims 6, 9-12, and 18/1 are allowable. Applicants request that the rejection be withdrawn.
